<b>Office Action Summary</b>	<b>Application No.</b> 10/540,142	<b>Applicant(s)</b> KAWAGUCHI, KUNIAKI	
	<b>Examiner</b> Margaret G. Moore	<b>Art Unit</b> 1712	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1712

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 to 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kashihara in view of Anada.

Kashihara teaches a polyacetal resin blend of a low hydroxyl containing polyacetal resin and a high hydroxyl containing polyacetal resin. See Table 1 which combines a polyacetal having a hydroxyl content of 18 mmol/kg with a polyacetal having a hydroxyl content of 100 or 150 mmol/kg in amounts that fall within the claimed range. While column 8, lines 5 to 10, teaches the addition of various fillers, Kashihara do not specifically teach the addition of glass fillers. Please note that this composition is used to make moldings.

Anada teaches polyacetal resin molding compositions. As can be seen from column 1, lines 15 to 23, it is known to include surface treated glass fillers to polyacetal resins in improve the mechanical strength. Note particularly that a surface treated filler used in combination with a boric acid compound (which is allowed for in the instant claims) provides notably improved molding compositions.

Thus one having ordinary skill in the art would have been motivated by the teachings of Anada to include a silane or titanate surface treated glass filler, such as glass fiber or glass flake, to the polyacetal resin molding composition in Kashihara in an effort to improve the mechanical strength thereof. The surface treated filler meets the requirements of claims 5 and 6.

For claim 2, please see column 2, lines 35 to 48, in Kashihara. For claims 3 and 4, see column 3, lines 35 to 62.
